

# MULTI-TORK® SOCKETS

# THE ORIGINAL TRIO: MT-50 / MT-100 / MTJ-770

**MT-301  
VALUE  
PACK**

Made of either tough polycarbonate or anodized aluminum, all three sockets are available individually or as the money-saving Value Pack. Included is a connector bit when using a portable drill or use solo with any 3/8"-drive socket wrench.

## MT-50

**Poly-Carbonate, Brass Insert**  
Captures virtually all 3 and 4-Lobe Industry clamp knobs  
3/8" Drive

## MTJ-770

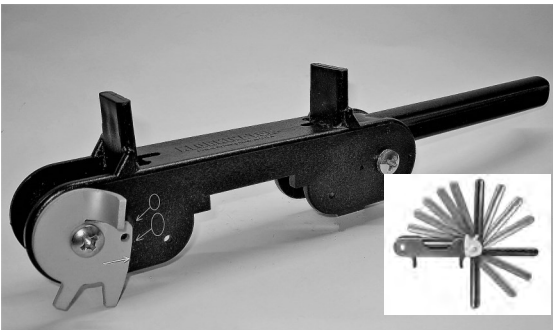

**Poly-Carbonate, Brass Insert.**  
For Sta-Rite® 2.25" and All Versions of Pentair® "System 3" clamp knobs. 3/8" Drive

## MT-100

**Anodized Aluminum 9/16" and 7/8" Double-Hex Socket**  
with 1-1/2" Deep Well.  
3/8"-Drive

## KW-212 Klorkinator®

The Klorkinator® is a light, but tough and extremely versatile wrench that begs its owner to find more uses. The four-way handle keeps it compact for travel or tool box. The glass-filled Nylon body and stainless steel hardware means strength without weight and many years of rust and corrosion-resistant service.

## DPW-150S Button-Hook®

Now in 11-gauge Stainless Steel, the new Button-Hook® is a stronger tool, but weighs only 5 ounces more than its aluminum predecessor. The handle has been shortened for easier access to some of those more elusive plugs and it now has a lifetime warranty. Another win-win for pool techs everywhere.

All Multi-Tork Products Proudly Made in the USA.
